GIACOBAZZI

HISTORY

Established in the early 60's in Sassuolo, in the most important ceramic district of Italy, Giacobazzi has always stood out for its ability to carry out internally the whole production cycle of parquet and wallcovering: from the drying, to the processing, and to the finishing, which is realized using the best materials.

Four generations that over the years have mastered the wood processing techniques, and the knowledge of its changeable natural characteristics.

The search for the best raw materials, the craftsmanship, the industrial production volumes, the quick response time, and an increasing attention to design, have led the company to cooperate with renowned architects and interior designers who search for a unique product in terms of quality, customization and style.

Eighty years of experience in wood processing allow Giacobazzi to look ahead to the future with self-awareness, curiosity, and with a clear aesthetic target: to make beauty concrete in our daily life.

The long history based on love for wood, experimentation and search for tree species, have created a new language that nowadays expresses itself through shades, shapes, textures, and feelings.

A language that does not talk anymore about floors only, but also about coverings extended on different sizes and volumes: from boiserie to ceramics, from natural pigments to digital printing process.

STORIA

Fondata all'inizio degli anni '60 a Sassuolo, nel comprensorio di tradizione ceramica più importante d'Italia, Giacobazzi da sempre si distingue per la capacità di realizzare internamente l'intero ciclo produttivo del parquet e del rivestimento: dall'essiccazione, alla lavorazione, fino ad arrivare alla finitura realizzata con i migliori materiali.

Quattro generazioni che hanno approfondito nel corso degli anni le tecniche di lavorazione del legno e la conoscenza delle sue caratteristiche naturali mutevoli.

La ricerca delle materie prime più pregiate, l'esecuzione artigianale, i volumi produttivi industriali, la velocità di risposta e una crescente attenzione al design, hanno portato l'azienda a collaborare con architetti e interior designer di rilievo alla ricerca di un prodotto unico per qualità, personalizzazione e stile.

Ottant'anni di esperienza nella lavorazione del legno permettono a Giacobazzi di proiettarsi al futuro con consapevolezza, curiosità e con un obiettivo estetico chiaro: rendere la bellezza concreta nel quotidiano.

La lunga storia di amore per il legno, sperimentazione e ricerca di essenze ha originato un linguaggio nuovo che oggi si esprime attraverso tonalità, forme, consistenze e sensazioni.

Un linguaggio che non parla più soltanto di pavimenti, ma di rivestimenti estesi su dimensioni e volumi diversi: dalle boiserie alle ceramiche, dai pigmenti naturali alla stampa digitale.

COLLEZIONE

Sinuous perceptions of geometries, colours, and evocative patterns.

Like an ancient decor, wood becomes a pure element of wall and floor decoration and it is suitable for rhythmic texture printing which recall atmospheres of the '60s.

Sinuose impressioni di geometrie, colori e pattern evocativi.

Come un parato, il legno diventa puro elemento di decorazione a parete e a pavimento si presta alla stampa di texture ritmiche che richiamo atmosfere anni '60.

MATTONELLE

COLLEZIONE

Unprecedented movements and multiform structures break the schemes of the classic wooden caisson floor.

The inspiration comes from tradition, but the combination of geometrical shapes, shades and nuances, gives life to the original and eclectic concept of wooden composition.

Movimenti inediti e strutture multiformi rompono gli schemi del classico pavimento a cassettoni.

L'ispirazione viene dalla tradizione, ma la combinazione di forme geometriche, disegni, toni e sfumature dà vita a un concetto originale ed eclettico di composizione in legno.

Il recupero di un'antica tecnica giapponese e del suo sapiente controllo del fuoco danno vita a una collezione unica, composta da un solo elemento: una boiserie inedita dal colore nero e dalla superficie quasi lucida.
